Available Non-Stock Species

Cedar
Mahogany (Khaya and Genuine)
Jatoba (Brazilian Cherry)
European Steamed Beech
Wenge
Alder (Knotty and Clear)

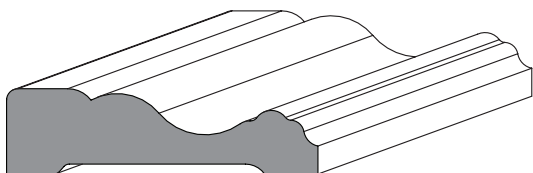

Please call to inquire about other species.

OUR PRODUCTS

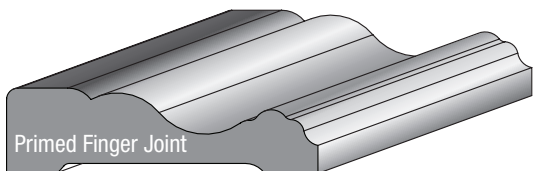

At Talbot Wood we value quality and service to our customers above all else. Our 44,000 square foot plant is vertically integrated to provide one of the most complete product mixes in the industry. We have hundreds of in stock profiles in a variety of species and many more in our custom profile department: rough lumber, dressed 4 sides, dimensioned product, custom cabinet doors, dovetail drawer boxes, CNC machining, and laminated products are all available with short lead times. If there is something you don't see in our catalogue please contact us as we have the ability to make custom profiles in house. We source our lumber from suppliers who comply with all government regulations working to provide material with the best yield possible. Additionally we recycle over 90% of our solid wood waste for resale instead of putting it directly into the landfill; this allows us to keep costs down while protecting the environment.
